- p9 Reserve a Booth Today for the Business Expo
- p10 Start an Internship Program with Help from Us
- p11 Several Members Get Green Certified

Members Go Green

A handful of Chamber members recently signed up to begin their journey toward green certification through two different programs, Green Seal and Go Green Plus. Laser Plus, Wenger's Feed Mill, Inc., jke marketing & communications, RW Sauder, Inc. and True Edge Performance Solutions, LLC committed to working with The Chamber's Go Green Plus certification program to help their business become more sustainable. Lancaster General Health and Susquehanna Association for the Blind & Vision Impaired jumped into Green Seal, a new pilot program for organizations seeking guidance and technical assistance to start implementing green practices into their business.

Stay tuned for more information on these companies as we follow their journeys toward achieving green certifications and growing in their commitment to become more sustainable businesses. Visit lancasterchamber.com then "Go Green" to learn more about these certification programs, and catch up on other green information and resources.

"Green Plus is not simply about taking steps to be green in the way that we all are aware we should, it is about how making careful, sustainable decisions affects every aspect of your business life; the people you work with, the success of your organization, and ultimately, the planet we share. Green Plus is not for wimps, it is a challenging, carefully considered assessment that will force you to look carefully at the reality of your daily practices. We chose to step up with the certainty that by accepting the Green Plus challenge, Laser Plus has a deliberate and carefully defined vision of who we are, where we want to go and how we will get there."

—Mary Renner, President, Laser Plus
(first business to be certified in Pennsylvania through Go Green Plus)
